

# New Jubilee Twis-To-Floor® 4000 Series Cleanouts

## From Jay R. Smith Mfg. Co.

Commemorating the celebration of 75 years of service to the specification plumbing industry, Jay R. Smith Mfg. Co. introduces the "JUBILEE SERIES" TWIS-TO-FLOOR® CLEANOUT. This totally re-engineered line of cleanouts, representing the most extensive product change in Smith's history, is THE PRODUCT SOLUTION for construction in the 21st century.

Jay R. Smith Mfg. Co.'s new "Jubilee Series" Cleanout line meets all the requirements of codes and standards for maximum access, while providing an aesthetically pleasing product for finished floor installation.

The Twis-To-Floor® Cleanout's new features also incorporate additional strength during and after installation and unique versatility in adjustment before and after the pour, features every contractor can get excited about using.

The 75th Anniversary introduction of the "Jubilee Series" Cleanout illustrates Smith's continuing commitment to our engineering community and the craftsmen who install our products.

## *The Twis-To-Floor®, Jubilee Series, Cleanout line Features*

The new Jay R. Smith Mfg. Co. Twis-To-Floor® Jubilee Series Cleanout is a fully re-engineered product line that addresses the concerns of today's construction professional. Take a look at some of its exclusive features:

- One size top assembly for 2-4" outlet ferrules eliminates sorting tops by size, maximizes installation versatility and uniform appearance;
- New regularly furnished thicker finished floor cover reinforced with support ribs for strength and durability to eliminate dishing;
- Regularly furnished finished floor cleanouts provided with unique new top assembly which allows for interchangeability of scoriated, tile or terrazzo covers AFTER finished concrete pour;
- Finished floor top frame and cover secured independently so frame stays in place when cover is removed during maintenance;
- The smooth outside surface of the top assembly and the thread protector Styrofoam ring maximize adjustment during and after the finished floor concrete pour;
- 2-4" ferrules for no-hub, spigot, inside caulk or gasket outlet connection provided with external machined thread for positive non-tilt engagement of adjustable top;
- Machined ferrule provides positive non-tilt engagement for optional threaded anchor flange and clamping collar which can be adjusted for waterproof membrane placement;
- All 2, 3 & 4" ferrules regularly furnished with the same size slotted head plug as standard whether brass or plastic, tapered thread or gasket seal plugs are required.

**These are just some of the reasons for specifying and installing the new Twis-To-Floor®, Jubilee Series, Cleanout from Jay R. Smith Mfg. Co.**
