

CUSTOM TRENCH DRAINS

YOU WILL NEVER LOOK AT A TRENCH DRAIN
THE SAME WAY AGAIN.

A common trench drain does its job well. This drain is strategically placed and ready to handle whatever Mother Nature sends its way. Functional – But imagine...

A Custom Image trench drain is no longer just a means of water runoff. This Smith Custom Images trench drain grate combines function with the design, giving an architectural finish to the installation.

Various shapes and sizes of Custom Image perimeter drains

When a trench drain installation calls for a unique, aesthetically pleasing way to catch and drain water Jay R. Smith Mfg. Co. can custom design a trench drain grate for any of the Jay R. Smith Mfg. Co. Drainage System products (Enviro-Flo® and/or Smith/ACO Trench Drain Series) as well as stainless steel perimeter drains to meet the specific needs for finished floor installations and to maintain free area.

Custom Image Perimeter Drains

- Non-sloped, stainless steel
- From 1" to 6" wide
- Length and shape can be designed to fit the application
- Function as catch basin or mini-trench drain

Ideal for fountains, hotel swimming pools, health club hot tubs, or corporate restrooms

CUSTOM DESIGNED GRATES AND COVERS

**FROM MECHANICAL REQUIREMENT
TO ARCHITECTURAL OPTION**

Endless design options possible.

**CUSTOM DRAINS AND
CLEANOUT COVERS**

Jay R. Smith Mfg. Co. has been engineering cleanouts and drains for almost a century to meet codes and standards. Meeting these requirements is paramount but equally important is the architectural and engineering need for aesthetically pleasing products for finished floor installations. Our line of cleanouts and drains more than embrace these fundamental design needs.

For finished floor applications, we are taking aesthetics and function to a new level with Custom Images.

CUSTOM IMAGES

Jay R. Smith Mfg. Co. has been known for innovative products designed to creatively meet the needs of the industry.

In that tradition, we are applying the latest advances in computer assisted

manufacturing technology to create Custom Images. With this technology we can enhance the visual appeal of cleanouts and drains for interior and exterior applications, while maintaining their function. Our unique and powerful machinery allows design possibilities well beyond traditional concepts of drains and cleanouts.

Today, drains and cleanouts can carry a team or corporate logo or have a look that echoes the design of the building. From a hotel promenade to a corporate restroom, from a stadium concourse to a collegiate cafeteria, Smith Custom Images can accent a building's appearance.

**CUSTOM DESIGNED TO FIT
YOUR SPECIFIC NEEDS**

With Custom Images, Jay R. Smith Mfg. Co. literally bridges the gap between mechanical requirements and architectural options. Our unique process offers the engineering or architectural specifier a panorama of design considerations for routine drainage and cleanout functions.

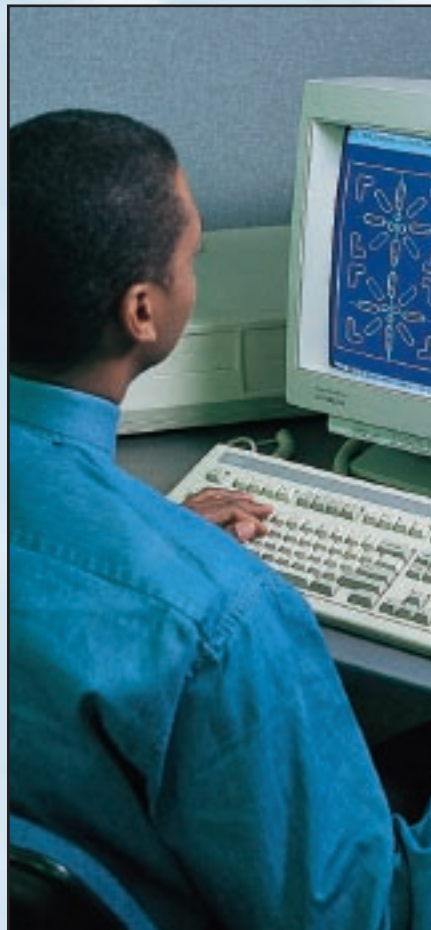

Almost any logo, signature, emblem or image can be captured and reproduced in crisp detail. Images can be etched or completely cut through to serve as the free area.

While designing an attractive appearance, we will ensure that the

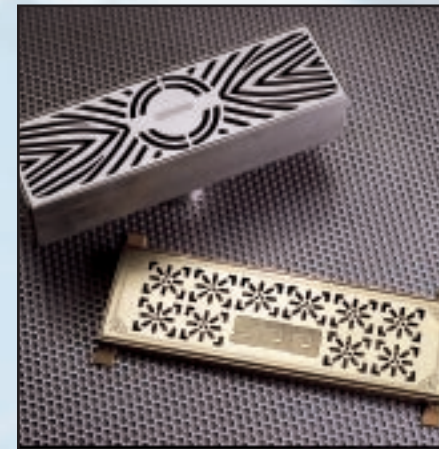

open-area for the floor drain and trench drain can handle the drain's primary function.

Custom Images can be captured on a variety of surfaces to include nickel bronze, polished bronze, stainless steel, and/or cast iron.

Call your local Jay R. Smith Mfg. Co. Representative today to find out how this exciting new process can enhance your next job, or visit our website at www.jrsmith.com.

Our engineering experts will work with you to come up with the perfect design.

Trench Drain Grates

Floor Drain Tops

FUNCTION AND FORM

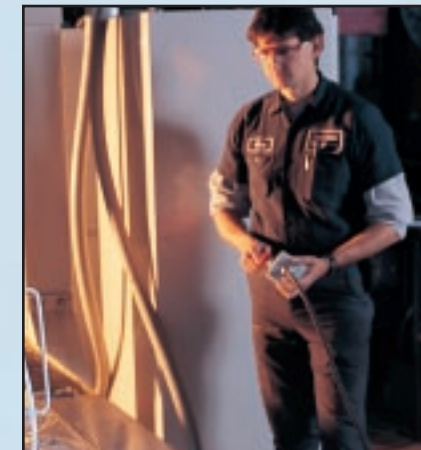

Limitless design possibilities for floor drains, cleanouts and trench drains. Enhance both exterior and interior architectural design.

Applications:

- Hotel Promenade
- Corporate Restroom
- Stadium Concourse
- Collegiate Cafeteria

Cleanout Covers

State-of-the-art technology allows us to incorporate your design into floor drain grates and cleanout covers.

Optional Materials: brick, marble and tile
